# SAFELAB GOWNS

## Gowns for Hazardous Drug Compounding

Safelab Gowns ensure maximum comfort and protection during procedures involving Hazardous Drugs.

They are designed with reinforced critical zones, chest, sleeves and front belt, the places where infectious material is most likely to come into contact with the wearer.

Delta Med Gowns are disposable, long- sleeved, open-back, with a poly-ethylene coating and knit cuffs.

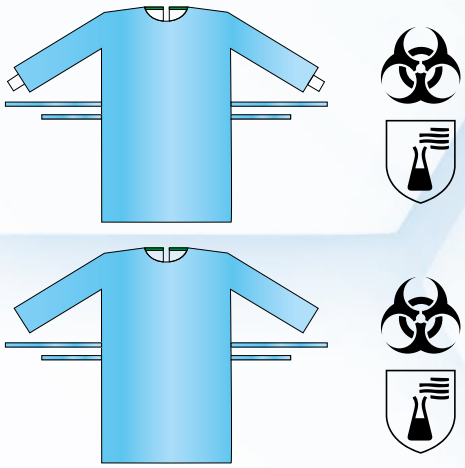

Certified as a Category III Personal Protective Equipment (PPE) and manufactured in compliance with European Regulations.

Available in both **sterile** and **non-sterile** versions, in various sizes (S, M, L, XL, XXL,).

GOWNS GUIDELINES
Gowns should be worn during all activities involving chemotherapy drugs, including compounding, administration, the handling of waste from recently treated patients, and clean-up of spill.
