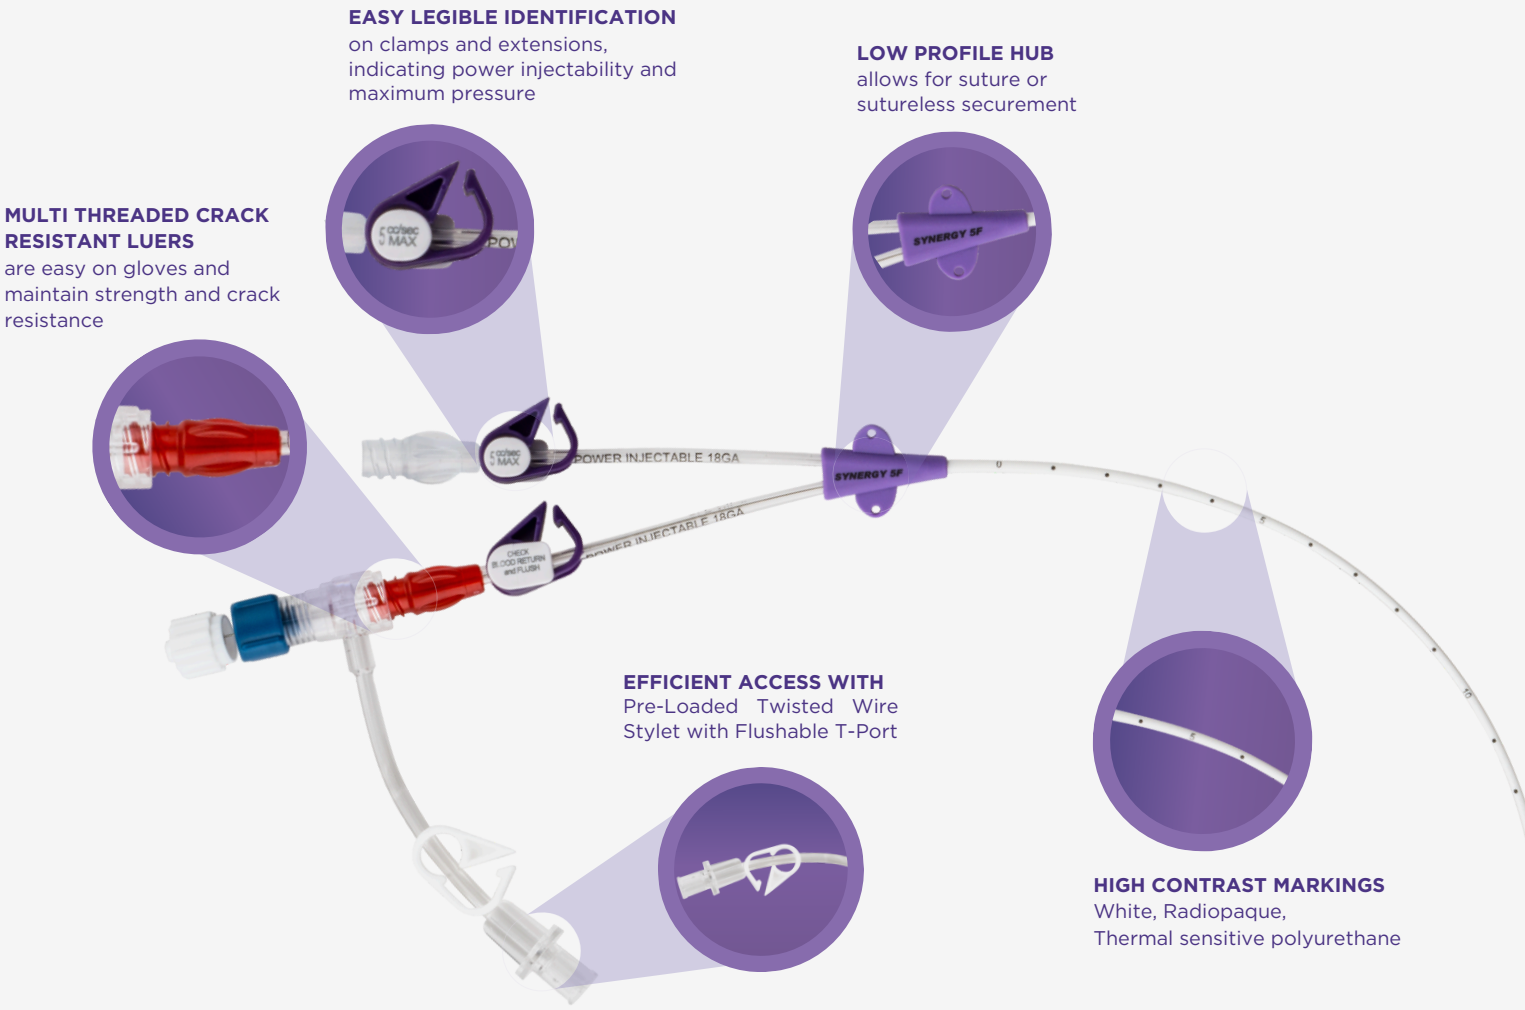
HUMAN INNOVATION TECHNOLOGY

The SYNERGY PRO CT PICC™ offers the ease and effectiveness of Power injectable PICC access with advanced performance, creating a SYNERGY of intravenous therapy options for healthcare practitioners.



Features and Benefits

Maximum Injection Rates: Engineered for high-performance imaging, SYNERGY PRO CT PICC™ allows injection of contrast media at rates up to 5 mL/sec—ideal for contrast-enhanced CT scans.

Reverse Taper: Featuring advanced reverse taper technology, SYNERGY PRO CT PICC™ minimizes post-insertion bleeding while maintaining optimal catheter stability and radiopacity.

Durable Polyurethane Construction: Crafted from biocompatible polyurethane, the catheter ensures flexibility, strength, and patient comfort throughout the course of therapy.

Advanced Kits and Components: Each kit is thoughtfully organized with familiar, high-quality components to support clinician efficiency and safety. Features include echogenic safety needles for enhanced visualization, premium guidewires, tearaway sheaths for seamless catheter placement.

Low Profile Hub: Designed for easy securement and greater patient comfort, the compact hub sits discreetly against the skin to reduce irritation and interference with daily activities.

Winguard®: Silicone constructed, low profile, suture-less securement for increased patient comfort and protection.
